

DRAFT – Existing Biomass Facility Data Request

This document is a draft for discussion purposes only, and has not received formal legal review by counsel to the Authority, nor any approval of the Authority.

The California Power Authority is seeking to procure Non-Firm Energy from a limited number of existing, non-contracted biomass facilities located in California. To be considered by Power Authority, a Sponsor must provide the following information about their project.

Project Contact Information	
Owner/Sponsor:	Contact Name:
Address:	Contact Address:
Telephone Number: Fax Number:	Telephone Number: Fax Number:
	E-mail Address:
Project Information	
Project Name:	
Location (as specific as possible): Interconnection/Delivery Point (SP15-NP15, Utility, etc)	
Size (MW):	
Is the Project under an existing QF or Standard Offer Contract? If yes, please describe.	
Does the Project have a captive fuel supply?	
Is this a Cogeneration Project?	
Fuel Supply Type/ Current Contract Terms	
Project Operations	
Project Lifetime Operating Hours:	
Date of Initial Commercial Operations:	
Average Annual Energy Production (MWh's/yr):	
Was the Project operational as of October 1, 2001? If no, why not?	
When could the Project begin energy sales to the Power Authority?	
Equipment Type (Vendor/Manufacturer), Age:	
Heat Rate:	

DRAFT – Existing Biomass Facility Data Request

This document is a draft for discussion purposes only, and has not received formal legal review by counsel to the Authority, nor any approval of the Authority.

Are all permits current and valid? If not, why?	
Hours Permitted to Operate (hrs/yr) – (Indicate 2001 limits vs. limits on later years, if different):	
Pricing and Availability	
Energy Price (\$/MWh): (Sponsor to propose price)	
Annual Availability Guaranty (Sponsor to propose percent of hours per Year)	
Project Credentials	
Sellers Credit Support, identify limits on liabilities	
Sponsor Project History – List other projects in operation	
Additional Information: Certification by an officer of the company that this existing biomass facility will immediately cease operations if the facility does not receive a power purchase agreement.
